

Attachments for SVE Trucks

SVE Truck Attachments - Svetruck began in the year 1977, designing a durable, reliable and service-friendly lift truck. When they started that year the company had a clear vision of the kind of company they wanted to be and the kinds of items they would like to manufacture. Svetruck specializes in creating lift trucks which enable the individual operating it to work efficiently within challenging environments. Svetruck believes that being capable of executing safe and successful material handling in the best possible way really helps in order to contribute to a positive work environment.

Home to their manufacturing facility in Ljungby, they manufacture machines such as container handlers, forklifts and log-stackers. To this date Svetruck is proudly supplying forklifts and other lift trucks to their global customers.

Svetruck is still focused on the future and is still devoted to maintaining their strong status for reliability and durability. Their basic approach to solid experience, high quality and more than 30 years of knowledge in the field, means they can provide the market exceptional solutions for all of their material handling requirements.
