

Clark Forklift Parts

Clark Forklift Parts - Currently, there are at least 350,000 Clark forklifts performing globally, and upwards of 250,000 operating in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specialized components designed for 20 distinctive designs of forklifts and automated equipment. Your local Clark Dealer is your complete source for availability of all your parts needs supplied by Clark Totalift.

Clark features a exceptional Parts Supply team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Clark Totalift has a really amazing intercontinental support network. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is now a standard feature on every lift truck.

Clark's continual effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the globally accepted quality standard ISO 9001 for each and every one of their manufacturing plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has selected the structure of "Lean Production" at all of its assembly plants for the reason that this technique is particularly economical and allows for minimal use of resources. Established to guarantee maximum proficiency, this system is designed to find and acknowledge the most efficient ways for production facility stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers join together to perfect the efficiency and brilliance of their products while minimizing expenses. The contemporary value engineering program combines innovative product growth and delivers superior consumer support and service within the industry.
