

## Aerial Work Platform

Aerial Work Platforms - There are a variety of forklift attachments presented on the market. They can help transform your forklift so that you can expand your ability to pick items up or complete clean up tasks and material handling with out difficulty.

A lot of the attachments are specially designed to fit on the blades themselves. Fork extensions for example, are utilized when you need much more blade length, which increases lifting capacity. Blade extensions come in lengths ranging from 48-120 inches. Triangular or rounded attachments are another kind used when moving rolled material to be able to ensure it does not roll off of the standard flat forks.

Examples of lifting accessories consist of pivoting and telescoping crane or boom accessories. They can come in several various styles and are usually meant for transporting lumber, poles, metal bars and various kinds of bulky items. Other attachments such as various kinds of hook plates and hooks are offered in order to lift items with a sling or chain. Slab lifters and magnetic filters are other things which can be utilized with hook attachments. Slab lifters are specialized attachments which are used for carrying different materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your forklift in order to make transporting rolls of carpet much easier. The accessory hooks onto the forklift's blades and has a pole which goes through the middle of the carpet roll.

There are many types of forklift accessory designed for facility maintenance like for example snow blades. These industrial blades can be attached to front end loaders and designed for moving materials such as dirt, and mulch as well as snow. Other common cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the forklift blades hook onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up quick and simple.

A material spreader is another forklift attachment which is often utilized at facilities. These spreaders are helpful for a range of applications like spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Another optional lifting accessory are work platforms. These can be used by lots of various businesses day after day. Platforms may differ in size from 36" x 36" to up to 60" x 60". Several units may be obtainable and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location making use of the lift truck. Larger platform units have extra space for personnel to bring tools and other essential stuff for the job. Often work platforms are constructed of steel or ploy material.
