There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving lift truck equipment and materials handling equipment. This network permits Doosan Infracore America to aggressively compete in this competitive market. The forklift product line remarkably features 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding lift truck company in the North American marketplace, due to their reliability in maintaining a high level of customer service excellence and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. forklift division situated in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a nationwide machinery expansion project. Early product sales of this manufacturing equipment focused on large business groups, the armed forces and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction became the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a position of substantial growth of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling market. This project proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company completed development of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a international sales network and started exporting models they had developed through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
